Objective

A challenging position as a web programmer and/or a web service engineer.

Work Experience

ABC Internet Media

- **Manager of Tech Division , Director. 2011 - Present**

- **Web engineer & Web programmer. 2009 - 2011**

The company manages some large scale web sites. I joined as an engineer at Tech division, and worked on system design and development of CMS [Contents Management System].

Set up Linux servers running MySQL and Apache, and wrote PHP code to run the server.
Used KVS for load dispersion and speed-up.

Moreover, although the scale of the website became large due to the abolished and merged systems, our team succeeded in downsizing the system, which resulted in reducing about 40% of the cost per month.

I am also working on the system improvement for the internal operations using PHP, Ruby on Rails, and Perl. Recently, I was promoted to a manager of the division, and my new responsibilities include management of team members and negotiations with other divisions or clients.

EFG IT Corporation - Programmer. 2006 - 2009

Created CMS of the on-demand video site. APS.NET, VB.NET, and C#.NET were used for programming languages, and MySQL and Oracle for Databases. We were a team of 5 people. I proposed using "Agile Development Process" and the team used this process for the first time.

HIJ Telecom - System Engineer. 2004 - 2006

I was in the development team of the billing system of phone call charges. My job was writing specifications and testing the system. The billing system was very large and complicated. I worked with about 10 developers.

OPQ Systems Integrator - System Engineer. 2003 - 2004

I developed the web systems using Java. I also studied object-orientation and the MVC architecture.

Keywords: J2EE, JSP, Struts, CORBA, C#, Pro*C, Jakarta products, Tomcat

VWX Manufacturer - Programmer. 2000 - 2003

I participated in the Ticket Booking System of the railroad company as a programmer of COBOL. The system was based on the VWX Mainframe with VWX OS and databases. I also used some JCL and PL/1.

Skills and Certifications

Programming Skills : PHP, Java, HTML, CSS, Ajax, SQL, Ruby, Perl, bash, csh, VB.NET, C#.NET, COBOL,

CakePHP, Zend, symfony, codeigniter

Web Application Servers : Apache1.3 / 2.x , Apache Tomcat

Databases used : MySQL, Oracle 8i / 9i / 10g (I had "ORACLE MASTER Gold 10g"), MS SQL Server

Education

ABC College of Technology - Diploma.
